

GPS SAFETY TIPS

WHERE TO MOUNT GPS

Car

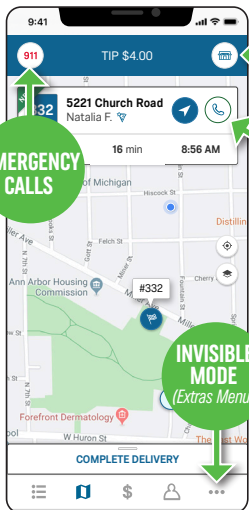

Bike

TUSA employees are required to place the mobile device securely in the dash mount while making deliveries. Employees of franchisees are encouraged to use a dash mount, but should follow the procedures implemented by their organization.

You should NOT keep the phone in your hand, seat, or any other location that is not a mount.

DRIVER APP: Safety Features

CALL THE STORE

CALL CUSTOMER

ONE-TOUCH CALL BUTTONS

INVISIBLE MODE (Extras Menu)

EMERGENCY CALLS

SAFE MODE

The app will automatically place itself in safe mode when it detects movement over 5 mph. The only features available to you are the visual/audio routing and one touch call buttons.

INVISIBLE MODE

If you ever feel unsafe, you can enable "Invisible Mode" in the Driver App. To enable this mode, click on the extras menu icon, then click "Invisible Mode." *Turning on Invisible Mode hides your location from the customer, but not from the store.*

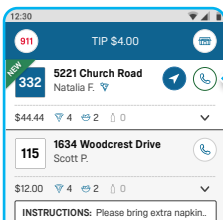

MASKED CALLS

This prevents the customer from knowing your personal phone number if you are using a personal mobile device.

Note that information and data for calls made from the Driver App are still collected by the Company.

CUSTOMER CALL-BACKS

This feature notifies a driver, on the order and map screens, when their order is a new customer, making it easy to do customer call-backs.

At all times you should follow safe driving practices and observe applicable traffic and parking laws. This includes, but is not limited to, not using a mobile device to send, read, enter any type of electronic message (such as email or text) or content (such as websites or social media), or talk through the use of a hands-free speaking device. You understand that any routing information made available in the Driver App is only a suggestion and that you must determine the actual route taken based upon current road and traffic conditions and weather.
